

# Discover ideas for creating the future at Fujisawa SST!

In 2024, 10 years after the opening of the town in 2014, the development of the town is completed. This marks the transition from the “Creation and Construction Phase” to the “Growth Phase” of the 100-year town development project. The town is full of the wisdom of ever-evolving town development through the participation of industry, government, academia, and residents.

Fujisawa SST Website

You will encounter new discoveries such as business tips and research themes.

Know

Is this how towns are created and evolve?

A cutting-edge smart town born in the nature-rich Shonan Fujisawa. Since its opening, the town has been visited by some 40,000 people and has attracted a remarkable amount of attention. Here we introduce the process and initiatives of Fujisawa SST town development to the present.

Feel

Is sustainable living comfortable?

We have high environmental and energy goals and the framework to achieve them. This includes carbon neutral initiatives and the establishment of wellbeing in the local community. Our expert attendants will explain the “Fujisawa SST lifestyle” in an easy-to-understand manner as you tour the town.

Inspiration

What are the new ideas for tomorrow?

Demonstrations and town meetings. New business ideas continue to emerge, and the town is evolving sustainably. Through the Leaders' Sessions, we also exchange opinions on town management know-how and co-creation incubation.
